

DROP TUBE 7/3.7MM RIBBED 2XGRP WITH PULLCORD 1000M

Art.nr. 950-005

Short Description

Drop Tube 7 / 3.7 mm Ribbed with Pullcord is a metal-free microduct designed for outdoor fibre drop installations. The ribbed inner structure reduces friction during cable installation, while the integrated pullcord enables fast and efficient cable pulling. Reinforced with dual FGRP strength members, the tube offers high tensile performance and excellent mechanical stability. The UV-resistant MDPE outer sheath ensures long-term durability in outdoor environments. Supplied on 1000 m drums for efficient handling and deployment.

PRODUCT OVERVIEW

Overall

- **Product Diameter:** 7mm
- **Product Weight:** 28g/m
- **Colour:** Black
- **Metal Free:** Yes
- **Minimum Bend Radius (Note 4):** 22D
- **Maximum Tensile Load:** 650N
- **Suitability for Outdoor Use:** Yes - outer sheath contains 2.5% carbon black
- **Product Specification:** CP1370

Microducts

Construction

- **Outer Sheath:** MDPE, black, 1.57mm thick, outdoor grade
- **Inner Sheath:** Liner, white, 0.08mm thick
- **Strength Member:** 2x 0.8mm (0.6mm FGRP with adhesive coating)

Print Marking

Packaging

- **Product Length:** 1000m
- **Pack Type:** M6 drum plywood 600x300x300mm
8x 1000m on a pallet (1200x1200mm)
